

RADIATORS

Radiator Nylon Capping Tool 1/2" & 3/4"

Innovative new tool designed to facilitate convenient and mess-free removal of radiators. Available in pairs, Rad Lifts act as both a plug preventing spillages and also act as handles to ease the lifting of the rad from the wall.

TYPE	CODE
Pair	SEL9225N

Plumbtub

Flexible rubber drain down tub. Flexible flange creates a perfect seal every time and its bendy nature means it can be used at different angles even on horizontal pipes. Fits 10, 12, 15 & 22mm. Holds 1.4 litres.

Tub	SEL9235
-----	---------

Dose Up

Quick, clean and easy system filling

The Dose Up is used for the quick and easy replacement of central heating chemicals by connecting via a combi-boiler using the water pressure to introduce the measured amount of inhibitor. By regular replacement of inhibitors the life and efficiency of central systems can be maximised.

- Save money
- Use any liquid chemicals
- Connect to filling loop
- Flush with mains pressure in 15 seconds
- Reusable
- Extend the life of your system
